

HUERLEM PETERS

Product Designer | AI & Intelligent Experiences | UX/UI | Software Engineering

London, UK | 07432 786039 | huerlemp2@gmail.com | LinkedIn: Huerlem Peters | GitHub: Huerlem | Portfolio: portfoly-web-av2u.vercel.app

PROFILE

Product Designer with a BSc (Hons) in Computing, specialising in AI and intelligent digital experiences. I work across product strategy, UX architecture, interaction design, prototyping and implementation, with particular experience in conversational UX, user-controlled memory, voice and mobile products. My technical background in React Native, React, JavaScript, Firebase, REST APIs and SQL helps me collaborate across design and engineering and turn complex systems into clear, useful and human experiences.

CORE SKILLS

Product & UX: Product Design • UX/UI Design • Interaction Design • Conversational UX • UX Research • Information Architecture • User Flows • Wireframing • High-Fidelity UI • Interactive Prototyping • Design Systems • Accessibility • Responsive Design • Figma

AI & Engineering: AI Product Design • Intelligent Experiences • React Native • React • JavaScript • Firebase • REST APIs • SQL • Git • Agile

SELECTED PRODUCT DESIGN WORK

LUFU — AI Companion | Founder • Product Designer • Developer | 2026–Present

- Designed and built LUFU end to end, from product strategy and UX architecture to high-fidelity UI, interactive prototyping and mobile implementation, centred on memory, continuity and relationship-aware AI interaction.
- Designed first-meeting, chat, memory, voice, profile/settings, subscription and system-state experiences, including a user-control model for inspecting, correcting and forgetting remembered information.
- Defined product governance for relationship progression and monetisation: capability and compute can vary by tier, while affection, recognition, trust and relationship progression remain independent of payment.
- Translated design decisions into a working React Native/Firebase product and supported iOS and Android release/beta preparation, bridging product design, AI behaviour and engineering.

IntelliShop — AI-Assisted Shopping Experience | Product Designer

- Redesigning an academic shopping product into a clearer end-to-end mobile experience, using the original personas, journey mapping, prototype testing and V1 interface as evidence for the redesign.
- Reworked information architecture and core flows across list planning, AI-assisted optimisation, store comparison, shopping mode and pantry management to reduce decision friction.
- Progressed the experience from low-fidelity validation to high-fidelity V2 screens, documenting key V1 → V2 design decisions and validating layouts across multiple mobile viewport sizes.
- Kept AI recommendations reviewable and user-controlled rather than fully automatic, balancing intelligent assistance with transparency and decision ownership.

AI Bedtime Storyteller — Client Product | Group Leader • Product Designer • Developer

- Led the project group, coordinating product design and development decisions for an AI-powered bedtime storytelling platform.
- Designed user journeys and accessible interfaces and contributed to front-end and backend implementation, including parent controls, child access, AI-assisted story creation and text-to-speech.

EDUCATION

BSc (Hons) Computing — Upper Second-Class Honours (2:1) | Solent University, 2022–2025

Relevant study: UX Research • Programming • Web Technologies • Databases / SQL • Data Analysis • Networks & Security

PROFESSIONAL EXPERIENCE

Assistant Manager — Le Montmartre, London | Feb 2022 – Oct 2025

- Led teams and coordinated daily operations in a fast-paced environment, resolving problems under pressure and strengthening leadership, stakeholder communication and prioritisation.

Manager — Sushi Gourmet, London | Jan 2019 – Sep 2021

- Managed recruitment, training, team operations and planning, developing coaching, collaboration and decision-making skills.

Hot Section Supervisor — Itsu, London | May 2018 – Dec 2018

- Supervised daily operations while maintaining service quality, consistency and team coordination.

ADDITIONAL INFORMATION

Languages: Portuguese (Native) • English (Fluent) • Spanish (Elementary)
